# PRICE LIST

TO ACCOMPANY THE

## TROPICAL PLANTING BOOK

OF THE

## ROYAL PALM NURSERIES

ONECO, MANATEE COUNTY, FLORIDA,  
U. S. A.

*Established 1883*

Including prices on all classes of planting  
materials, fertilizers, spray materials and  
equipment, horticultural books, etc.

Issue of January  
1939

# Business Rules

All prices in this catalogue are net delivered to railway agent, packing free, purchaser to pay cost of transportation, except where otherwise specifically noted. If there is no agent at the point of destination, requiring prepayment of express charges, or when the relatively small size of the order makes parcel-post service the more practicable, or when shipping to foreign countries, the following charges for such prepayment are made:

For prepayment of small packages by mail (or express shipments to points where there is no agent), Florida customers add 10 per cent to the total value of the plants. Outside of Florida and east of the Mississippi River add 20 per cent. West of the Mississippi River add 30 per cent. To foreign countries, add 30 per cent.

We cannot fill orders amounting to less than \$1. Such orders are a positive loss to us. Should you want a special plant amounting to less than that, add 25 cents.

**TERMS.** Cash with order. Remit by Postal or Express Money Order on Oneco, bank draft or personal check. Currency by open mail is unsafe. Foreigners may remit by International Postoffice Order on Bradenton, Fla., or by bank exchange.

In applying prices, 5 of a variety will be sold at the 10 rate, 40 at the 100 rate, and 250 at the 1,000 rate. This applies to single varieties only and not assorted plants.

**GUARANTEEING PLANTS.** This is not done by any reputable nurseryman unless he charges prices sufficiently high to more than offset any possible loss. When good stock is received in good condition, no difficulty should be experienced in getting it to grow and do well unless the conditions are not favorable, and it is obviously not just or logical for the nurseryman to have to assume responsibility for cultural failures!

And it would also hardly be fair to the customer who takes proper care of stock and who understands the requirements of different plants, to charge a price higher than normal merely to protect the nurseryman from losses incurred by guaranteeing stock to careless, incompetent, or unscrupulous persons.

**OUR RESPONSIBILITY.** We exercise the greatest care to have our plants true to label, both as a matter of policy and because deliberate carelessness or deceit would be business suicide. We hold ourselves prepared, on proper proof of error on our part, to make replacement of any tree or plant that may prove otherwise up to the amount originally paid for them, but no more. To this the purchaser agrees when ordering from us.

While our responsibility for safety of plants ceases after delivery of the goods to carrier, in so far as liability for damage is concerned, still we feel a personal concern for the interests of our customers and are anxious that their rights should be protected. In the case of shipments by express or freight, from which forms of service collection of damage claims is possible, we will guarantee safe delivery of all nursery stock, or to collect any just claim provided consignee has the agent at destination endorse the extent of damage or loss on freight or express receipt. The same provision applies to overcharge; we keep accurate record of all shipments, and if anyone suspects an overcharge, we will investigate same when they send agent's receipt and secure refund if such has been the case.

**FILLING ORDERS.** All orders are filled promptly. We ship with absolute safety to all parts of the world by parcel post, express, and freight. We exercise our best judgment when forwarding stock, whether by express or freight—in the former case using especially thin material—working for the best interests of each customer as to safety of delivery and least cost.

**SUBSTITUTION.** In ordering please state whether substitution will be permitted, as we feel at liberty, when no instructions accompany the order to replace with other sorts as nearly similar as possible.

**THIS PRESENT PRICE LIST** abrogates all previous terms, conditions, and prices. Authorized dealers desiring to buy in quantity should write us.

**RESERVE ORDERS** for stock for future delivery must be accompanied by a deposit of 25 per cent of the value of the order to insure us in booking the order and reserving stock.

**C. O. D. ORDERS** cannot be accepted unless accompanied by 25 per cent of the total amount as a guarantee of acceptance on delivery.

# Price List of Plant Materials Arranged Both Alphabetically and by Departments

## NOTE ON ABBREVIATIONS:

**o. g.** means open ground.

**spec.** means specimens.

**app.** means on application.

**B & B** means balled and burlapped.

(Where plants are wanted in quantities of forty or more to the single sort, write for special prices.)

o.g., 4 to 5 ft.....	.70	6.50
o.g., 5 to 7 ft.....	.85	7.50

## GARDEN SUPPLIES

It is often difficult to procure garden tools, supplies, etc. in the smaller towns and countryside. We are listing hereafter certain items that will be of general use to everyone interested in gardens. Should there be any items you wish to procure not here listed, write us and we will be glad to quote you.

In addition to the following listed materials, we can furnish a general line of garden furniture, pergolas, jars, vases, benches, bird baths, fountains, sun-dials, etc. Where ordinary stock items are not appropriate, our Landscape Department is prepared to make special designs and estimates at nominal cost.

## Landscape Service

The very great value of the services of an experienced landscape architect in the designing of grounds and the structures connected therewith is now generally recognized. This organization is prepared to furnish the services of a landscape architect of many years experience in Florida and the tropics. We urge correspondence from customers who wish to avail themselves of this service.

In this connection we are also prepared to make full installations, not only of general planting but also of pergolas, formal and informal pools, walks, lattice work, sprinkler systems, etc.

## Horticultural Books

Following is a list of books we suggest for the library of the garden enthusiast. If you wish to secure any book not listed herein, we will be glad to procure it for you at publisher's prices.

- Manual of Gardening.** L. H. Bailey. Practical information on the landscaping and planting of your home grounds ..... \$3.10
- Flower Garden Primer.** Julia Cummins. A most practical handbook for the amateur home gardener ..... 3.10
- Garden Maintenance.** Ortloff & Raymore. Maintenance, the second phase of gardening, is often neglected or mishandled. This book tells how to do things ..... 2.60
